Powersoft supply the Queen of Clubs in Paris

Queen Club in Paris is one of the most popular clubs of any kind in the country. Located directly on the Champs de Elysées, the best location in France for any venue, Queen attracts a fashionable, international clientele. Queen is essentially one large, 2500-capacity space with special VIP and mezzanine areas. The interior look is industrial, designed by Laurent Bouret, with concrete floors and steel chairs.

In terms of sound and light quality, Queen reigns supreme. A Martin Total Supplier package combines with electronic, disco and techno music to create an exceptional ambiance. Concentrated in terms of entertainment technology, Queen is equipped with the latest Mach, Martin, Jem, Eurotruss and Powersoft gear. Club installers were well-know French company SES Giraudon.

Some of the most important personnel in regards to the club, Gerard Giraudon himself, along with the architect and even Queen's house DJ, paid a visit to the Martin France facility, looking for an audio system with high SPL yet comfortable in terms of pressure. Because sound would need to be concentrated onto the relatively large main dance floor with little or no spill onto the adjacent VIP area, a combination of near and mid/high system was sought. They found what they were looking for in the Mach SlingShot system together with the Powersoft amplifiers- high SPL and exacting sound.
