

Powersoft reference: MAYDAY 2006 / FOON Audiotecture and TSE AG Berlin

Every year on April 30th, in the "Dortmund Westfalenhalle" it is held the „MAYDAY EVENT“ that is considered the largest indoor dance event worldwide

This year, famous German horn specialist Karl-Heinz Kuntze of FÖÖN audiotecture and TSE AG of Berlin teamed up to equip hall 2 with a loudspeaker system comprising FÖÖN's ultra-compact CLiA-Line-Array as well as small 12" hornloaded bass cabinets.

Two Powersoft K 10's were used to power a total of 24 12" bass-drivers, which were arrayed in two towers.

FÖÖN audiotecture's Karl-Heinz-Kuntze: "The small bass horns (ca. 40 x 50 x 60 cm) with a nominal power handling of 400 watts / pc. and a -3dB point at 36Hz develop an enormous sound pressure level, which was not primarily expected and which also certainly can be traced down to the enormous sub-bass qualities of the K 10's, which by the way performed absolutely classy and with the greatest ease at full continuous power over 13 hours.

Provided that the cabinets are accordingly wired, I expect one single K 10 to fire up all 24 boxes really well".
